

Cymbal Pools Partner Convention 2026

Riverfront Convention Center, New Orleans - October 14-16

Welcome

Cymbal Pools brings together installers, service partners and retail dealers for three days of product launches, hands-on workshops and certification sessions. This brochure summarises the agenda, the new product line and the partner programme updates announced this year.

Day 1 - Product Launches

09:00 Keynote: The Connected Backyard. Cymbal Pools unveils AquaSense, a sensor hub that reports pH, free chlorine, temperature and flow rate to the Cymbal mobile app every five minutes.

11:00 TideRunner Robotic Cleaner. Cordless, 4-hour battery, wall and waterline climbing, and a self-docking lift for easy removal.

14:00 LumaReef In-Pool Lighting. Colour-tunable LED niches with music sync and scheduled scenes, rated for saltwater pools.

Day 2 - Installer Workshops

Site inspection and soil assessment; excavation safety; rebar and shotcrete best practice; plumbing layout for variable-speed pumps; and a splash pad design clinic for municipal and residential projects.

Day 3 - Certification

Cymbal Certified Installer (CCI) level 1 and level 2 exams are held in the morning. Partners who certify three or more technicians this year qualify for Gold tier pricing and priority lead routing.

Partner Programme Updates

Lead routing now uses zip-code coverage maps; warranty claims move to the partner portal; and co-marketing funds increase to 4 percent of annual Cymbal product purchases for Gold partners.
